

# Automatic Tool Change Spindle Motor

Our SpindleMax motors are designed and manufactured in Italy, serviced by Ekstrom Carlson in our Rockford, IL facility. *We are the only American company to offer a pulley driven design automatic tool change spindle version.* **Some SpindleMax benefits include:**

- ISO30 or HSK63F automatic tool change spindles are the typical designs
- CAT, BT and Solid Shaft Designs are available upon request
- S1 Continuous Duty Cycle - Ratings also available for S6 intermittent duty
- Standard external cooling fan (*Water cooled motors are also available*)
- Dynamically balanced rotor to ISO G2.5 tolerances
- Sealed for life ABEC 7/9 spindle grade ceramic or steel ball bearings
- Spindle speeds to maximum 24,000 RPM are standard.
